

# OpTIvu

## Projected Capacitive Touch Technology

Touch International's OpTIvu technology boasts superior optical clarity and sets a new standard for projected capacitive touch screens. With multiple ASIC technologies to choose from, OpTIvu hides the diamond effect caused by the patterning process of the projective capacitive fields.

OpTIvu Technology upgrades can be incorporated into many of Touch International's projected capacitive touch sensors to provide optimal viewing capabilities while maintaining exceptional touch capabilities.

### Applications

- Digital Cameras
- Retail Signature Capture
- Medical Instrumentation
- Global Positioning Units

### Benefits

- Optimal Clarity
- Aesthetically Pleasing
- No Distracting Diamonds

Talk to Touch International today about optimizing your touch solution with OpTIvu.
